

AWP Leadership Awards

Regional or Global

Group ASI has established the Advanced Work Packaging Leadership Award to honor individuals with North American, European, or Global responsibilities and an established record for implementing AWP in their own organization while supporting AWP implementation across the engineering and construction industry. The award acknowledges those leaders that have demonstrated a long-term commitment to creating safer, more productive construction projects. Individuals must be nominated for this award and the selection is made by a panel of industry experts. The AWP Leadership Awards are applicable to owners, EPCs and contractors. Sorry, self-nominations are not acceptable.

Award Selection Criteria

Criteria for the AWP Leadership Awards includes the following:

- Significant contributions to the construction industry related to Advanced Work Packaging (i.e. innovation, effective implementation, business impact, and mentorship).
- Demonstration of the highest degree of personal dedication to improving costs, schedule, quality, and/or safety of the capital facilities delivery process. (Describe in detail)
- A leadership position in the construction industry from which others can be influenced by example and direction. (Is the nominee a mentor? Speaker? Entrepreneur? Innovator? Describe in detail)
- A record of accomplishment that brings added distinction to the recipient and the organizations with which he or she has been associated.
